

AMTEC

Automotive Manufacturing
Technology Education
Collaboration

AMTEC is at the forefront of education because the future involves a very different kind of technical worker, a very different kind of partnership, and a very different kind of education. As a collaborative we are excited about the future as we ignite out students' interests, educate them to compete in a global economy, and accelerate them into the workplace to become competent, well-educated members of the automotive and advanced manufacturing industries with increasing career pathway possibilities.

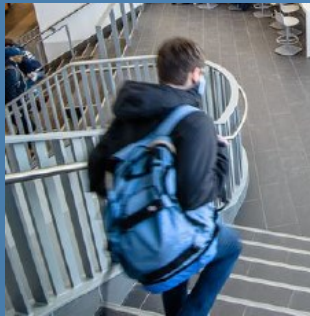

AMTEC has teamed up with more than 41 Community Colleges and over 31 corporate partners

What is AMTEC?

The Automotive Manufacturing Technology Education Collaboration (AMTEC) National Center of Excellence in Advanced Automotive Manufacturing is funded by the National Science Foundation as an Advanced Technological Education Center. We are a recognized collaboration of community colleges and automotive original equipment manufacturers and suppliers working to strengthen the competency and global competitiveness of our automotive manufacturing and service technology.
