

Develop Your Career in Manufacturing

Staying competitive in the manufacturing business world means getting new skills and knowledge on a continuing basis.

AMTEC, partners with two-year colleges, auto manufacturers, auto technicians, and auto suppliers to create industry-led maintenance certification assessments and to validate college curriculum aligned to industry-led skills standards

AMTEC's dedicated staff and faculty are committed to helping you succeed by offering online courses that help provided ambitious students with new opportunities in career education. Of course, we realize that your education doesn't end in the classroom and offer hands-on opportunities. Students in every program practice with tools and technologies required in real-world applications. Our instructors bring proven experience and skill to the process and genuinely enjoy sharing their knowledge.

AMTEC Offers:

- Industry Developed Curriculum
- Credentialed curriculum
- Manufacturing is embracing Mechatronics
- Corporate Partners
- Flexible training platform suited to working student

Our goal is to get you certified and successfully place you as highly skilled technicians and manufacturing engineers for work in automobile manufacturing and technology.
