

Increasing Productivity in Your Manufacturing Workforce

Staying competitive in the manufacturing business world means getting new skills and knowledge on a continuing basis.

AMTEC, partners with two-year colleges, auto manufacturers, auto technicians, and auto suppliers to create industry-led maintenance certification assessments and to validate college curriculum aligned to industry-led skills standards

AMTEC Offers Your Manufacturing Workforce:

- Consistency/Predictability
- Industry Developed Curriculum
- Assessments can be used to identify skill gaps, training only to the gaps which will result in cost reductions
- Increased Productivity with higher level of workforce skills
- Potential pipeline of new employees (pre-employment programs) with partner colleges
- Flexibility with blended learning and modularized learning format
- Option for both Credit and/or Non-Credit on-line offerings
- Wrap-around lab activities that help to validate learning outcomes

Our goal is to get you certified and successfully place you as highly skilled technicians and manufacturing engineers for work in automobile manufacturing and technology.
