AMTEC ACADEMY (NOVEMBER 2013)

AMTEC
Collaboration between Industry and Education

HOW DO WE MEASURE SUCCESS?

- Skill standards based on industry needs
- DACUM Analysis
- SMEs (Multi-skilled Maintenance)
- KSAs
- Enablers
(tools/technology/safety/communications/calculations)
- Criticality
- Core Standards
- Curriculum gap analysis
- Modularized curriculum
- Competency based testing
- Flexibility to meet changing needs

RELATED CORE FUNCTIONS

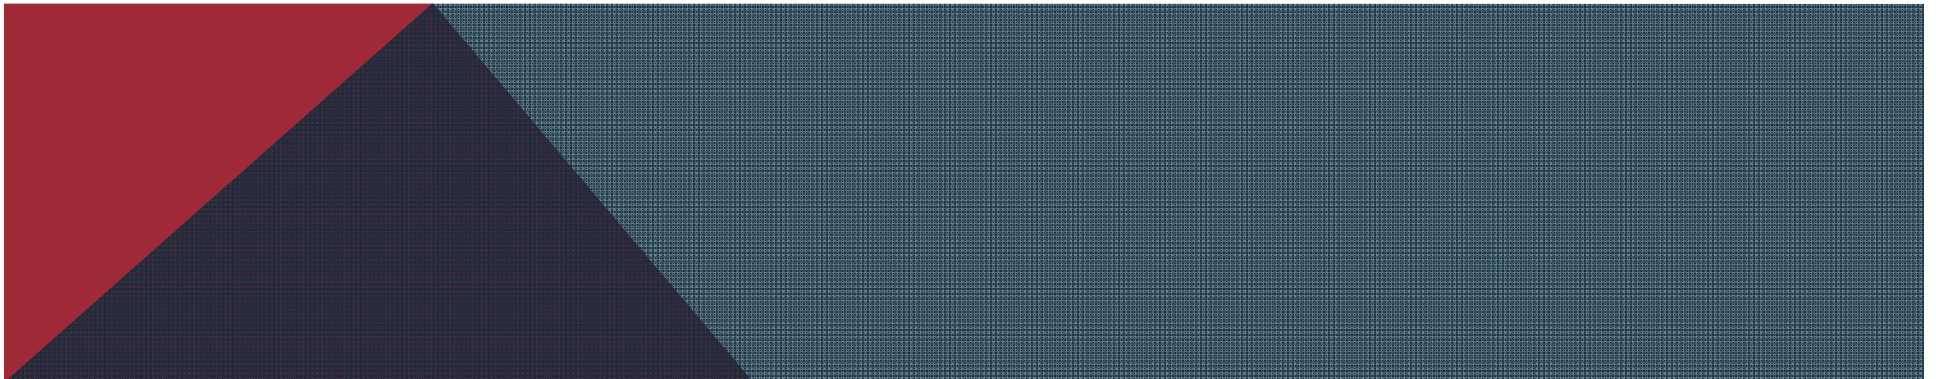

ASSESSMENT USES FOR INDIVIDUALS

- Identifying past achievements
- Discovering current aptitude
- Determining skill development needs
- Documenting competencies learned (regardless of time or venue)
- Assisting with job entry and mobility
- Seeking credit for Prior Learning
- Obtaining certification and recognition

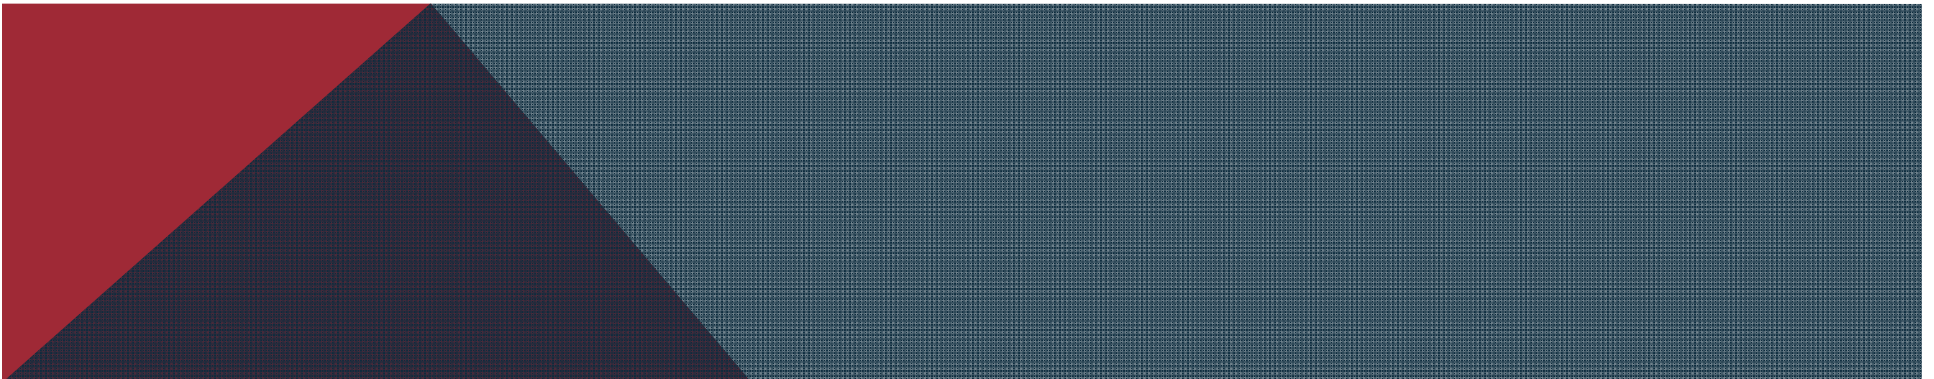

ASSESSMENT USES FOR EMPLOYERS

- Assisting with hiring/promotion decisions
- Documenting base-lines (individual or group)
- Determining training & development needs
- Verifying training accomplishments
- Developing human capital
- Establishing succession planning
- Making sound business decisions
- Improving organizational effectiveness

ASSESSMENT USES FOR EDUCATION

- Benchmarking against occupational standards
- Obtaining industry involvement in the educational process
- Providing students tools for success
- Documenting IM program success (End-of-Program testing)
- Obtaining Perkins funding (Accountability)
- Awarding credit for prior learning
- Teaching to targeted needs
- Providing meaningful credentials and certification
