Survey Issue:	*Other- "Module based viewing/downloading doesn't seem to be functional on all my modules. In my video you see me open a module where it works. I go to grades and then point to the groups option with the mouse. Then I open up another modules where group based grades option is missing. In the second example, I then open up that modules user groups page to show that it does in fact have multiple groups.
Survey Recommendation:	Fix issue.
Date/Resolution:	03/27/2017- Sent up to Anatoliy to fix issue.
